evismo is a Swiss eHealth startup. We offer 'Diagnostics-as-a-Service' for general practitioners, cardiologists, and clinics. We integrate and anchor new sensor technologies in the healthcare sector with the aim of providing patients with optimal care in the context of prevention, diagnostics, and therapy by means of remote monitoring. With our first service, CardioFlex® - the gold standard of long-term ECGs, we have already been able to provide answers for cardiac arrhythmias to more than 2,500 patients and 50 clinics.

We are currently closing our next round of funding and are therefore looking for a team player to join us in the upcoming growth and scaling phase. We are looking for a

Software Engineer

Key tasks

- Help us build, shape, and further develop our 'Diagnostics-as-a-Service' platform
- Analyze current software architecture and propose evolutions
- Design system and software architecture as well as provide pragmatic solutions of architecture challenges
- Develop new functionalities from front- to backend based on product and project requirements
- Evaluate and implement the latest tools, technologies, and frameworks

Key requirements

- Technical Master's degree, preferably in Computer Science or Software Engineering
- At least 3-5 years of professional experience in building software architecture and established programming languages
- Very good German and English language skills
- An agile mindset

Experience with or interest in these technologies

- Languages/Platform: HTML/CSS, (-preprocessors and -frameworks), JavaScript (-frameworks), Java, Python, PHP, Golang, Node.js
- API: OpenAPI, graphQL, Falcor
- Storage & Data: Kafka, S3, SQL, Mongo, Cassandra, Redis, Neo4j
- DevOps: Git, Gitlab, Vault, Docker, Kubernetes, Git, Linux, Cloud
- Architecture: Microservice/Service Mesh, Data-Streaming, Cloud native

We provide a remote-friendly work environment with a lot of professional experience, great creative freedom, and flexible employment conditions. Become a part of evismo and shape our global vision together with us.

Interested? Please get in contact with co-founder Alexander Panos at apanos@evismo.com or call us at 044 521 51 10.
